

MEWA REHABILITATION CENTER – PATIENTS’ TESTIMONIALS:

After a serious transport accident and a few months spent in a hospital which resulted in loss of one leg and miraculous rescue of another, I was looking for rehabilitation to the rescued, however slashed and unfit leg. To be honest, the team of physiotherapists from Mewa improved my functionality significantly – rehabilitation process is still in progress and due to this it improved the quality of my life. I was admitted there professionally – my documentation was studied thoroughly and my treatments were selected with great attention and care. There was no problem for physiotherapist to come to my place as well as bringing me to the Center for treatments. The personnel consists of young enthusiasts who are always looking forward to achieving a positive effect. They are well prepared and have a good attitude to their work. I believe that in my case these hands will perform miracles and I will avoid another surgery. I highly recommend.

I had been using Mewa services for 12 weeks after reconstruction of a cruciate ligament in my knee. In such a case it is very important to begin rehabilitation as soon as possible which in Mewa it was just after my first call. Despite common injury I met with very individual approach and even infectious optimism of physiotherapists. During the whole rehabilitation period the team stayed in contact with a leading doctor. Wide range of treatments (from massage to mobilisation, through physical exercises to physical medicine) were adjusted to my progress up to date. Everything in a newly opened, day by day better and better equipped place. Comparing to the center which services I used before... well, there is even nothing to compare.

Visits in Mewa Rehabilitation Center in Sopot Kamienny Potok I rate highly and positively. Mrs. Joanna, my physiotherapist, is a professional person very involved in her work, which gives so important feeling for a patient of “being in good hands”. The clinic’s personnel consists of nice, friendly and helpful young people. Set of treatments prepared for me was appropriate, varied and properly planned. The place is “fresh”, spacious and modernly equipped. I recommend.

I recommend Mewa Rehabilitation Center very much – reliable and quick service, high quality equipment, friendly atmosphere. Convenient times of rehabilitation, it is worth to have a look at wide range of exercises, massages, physiotherapists’ advices ☺

The place worth recommending!!! My kind regards to the whole personnel and Mrs. Dorota!!!:)

I am reading all these opinions and... I have to agree with them ☺ I also had and still have a pleasure to use rehabilitation treatments in Mewa Rehabilitation Center – I must admit as well that the therapy is effective in my case ☺ I use physical medicine treatments and exercises. Very professional approach to my problem and analysis of the medical documentation. Everyone is friendly, smiling, and the atmosphere is just lovely! This for sure has an influence on rehabilitation's effectiveness ☺ I will not list persons who work there by name as I would probably have to list them all, from reception to the strict management. I highly recommend!

I went to Mewa Rehabilitation Center in February with my fiancé. He was first to use their services. He had serious problems with his shoulder joints and a surgeon suggested surgery. My fiancé preferred to start from less invasive methods. Physiotherapists from Mewa Rehabilitation Center carried out diagnostics very thoroughly and led manual therapy, exercises and physical medicine. After one week of the therapy he already regained the ability to work by hands in everyday activities. After the next two weeks he regained full range of movements in both shoulders. Due to the fact that Mewa Rehabilitation Center's team turned out to be very competent and professional, and at the same time the atmosphere there is always friendly, full of kindness, I also decided to use their help. I suffered from tensions and muscle pains in cervical and lumbar segments of the spine. Thanks to cooperation with the physiotherapists from Mewa it was possible to eliminate pain and tensions – and this effect maintains until now. I highly recommend this team – they are kind professionals focused on providing help.

Definitely the best place on the Tricity map. I am impressed by the knowledge and skills, every visit is an injection of positive energy. Day by day my spine and knees are getting better ☺. For those who love physical exertion I recommend Maciek, thanks to whom even during rehabilitation exercises I do not forget what positive muscle pain means ☺. Besides, huge knowledge and personal charm ☺.

Mewa Rehabilitation Center is a very modern place not only for visual and equipment reasons – it's a place with innovative and individual approach to a patient. I went to Mewa thanks to a very positive recommendation from my friend. Diagnostic interview carried out professionally indicated that my problem is caused by the injury from over a year ago. Mewa team at once began to implement personalised rehabilitation plan which gave effects easily seen just after first visits!!! Slogan 'With Care and Concern for Your Functionality' is for Mewa team a rule in dealing with patients, that's why I highly recommend rehabilitation in this place. My sincere thanks to the whole team for shown understanding and provided help!

Recently, due to health problems (despite young age and active way of life), I was forced to use rehabilitation treatments. I went to Mewa and... I don't regret. Firstly I had professional diagnostics. Therapeutic sessions were carried out by right people on right places. Young physiotherapists, positive about a client, professional and smiling. MEWA's equipment in a full range, everything smelling new and not rising any reservations. I highly recommend MEWA for everyone who needs rehabilitation. I guarantee that it will be a good choice. My best regards to the lovable 'Lady From Behind the Counter'! ☺

I highly value and respect people who know what they do and they do it with passion. This is how Mewa Rehabilitation Center's crew is. The team consists of right people on right places. A client can count on a very individual approach and complex, comprehensive care either in a physical or – regarding a positive atmosphere there – mental sphere ☺. What distinguishes this center is unusual and unique – ambitious attitude of physiotherapists and rarely encountered commitment. Help to a patient there is even made a point of honour. A big advantage is a relatively short time of arranging meetings. During my cooperation with Mewa I changed my opinion about competency of a young personnel. Of course in plus. I recommend.
